About The London Company

- Employee-owned firm founded in 1994
- \$33B assets under advisement*
- Singular process for all strategies
 - Driven by a fundamental quality-value approach
- We invest in our portfolios alongside our clients

A Differentiated Investment Process

Our process focuses on protecting in down markets to deliver meaningful excess returns and lower levels of volatility over full market cycles.

- **High-Quality Companies:** sustainably high and improving returns on capital and strong balance sheets
- **Balance Sheet Optimization:** a novel approach to valuation that limits forecast risk inherent in growth projections
- **Focused Portfolio Construction** solves the problem of over-diversification: 25-35 high conviction stocks
- **Sell Discipline** seeks to avoid large losses to maximize return

Portfolio Characteristics

Disclosure Notes

The London Company's performances are size weighted and annualized based on calculations for the period ending June 30, 2026. The characteristics discussed herein relate to a representative account, and not every client's account will have these exact characteristics. As London manages its client portfolios according to each client's specific investment needs and circumstances, London cannot affirm that the characteristics of the account shown are similar to all accounts participating in the strategy. This is due in part to the timing of trades by the Advisor, market conditions, cash availability, and the timing of client deposits and withdrawals. Therefore, prospective clients should not assume that similar performance results to those shown would have been achieved for their accounts had they been invested in the strategy during the period. None of the information contained herein should be construed as an offer to buy or sell securities, or as investment recommendations.

Definition of Firm: The London Company of Virginia is a registered investment advisor. Registration does not imply a certain level of skill or training. More information about the advisor, including full descriptions of its investment strategies, fees and objectives, can be found in the firm's Form ADV Part 2, which is available upon request by calling 804.775.0317 or visiting www.TLCAdvisory.com. The London Company claims compliance with the Global Investment Performance Standards (GIPS®). GIPS® is a registered trademark of CFA Institute. CFA Institute does not endorse or promote this organization, nor does it warrant the accuracy or quality of the content contained herein. Please visit www.TLCAdvisory.com or contact us at 804.775.0317 to request a complete list and description of The London Company's composites and/or a GIPS® Report that adheres to the (GIPS®) standards.

Composite Creation/Inception Date: September 30, 1999

Composite Definition: The Small Cap strategy invests mainly in conservative, low-beta, small-cap equities with a focus on above-average downside protection. Primarily we seek profitable, financially stable small-cap companies that consistently generate free cash flow, high returns on unleveraged operating capital, trade at significant discounts to their intrinsic values, and are run by shareholder-oriented management. Positions are usually within the market capitalization range of the major, domestic small-cap indices. Accounts in this product composite are fully discretionary taxable and tax-exempt portfolios with a minimum of \$100,000 in assets. The product is measured against the Russell 2000 Index and has a creation and inception date of September 30, 1999. There is no use of leverage, derivatives, or short positions. All actual fee-paying discretionary portfolios are included in one or more composites that have been managed for a full calendar quarter with limited restrictions and similar objectives. As of July 1, 2022 The London Company redefined the composites to exclude all dual contract relationship and any potentially bundled fee scenarios. This policy is not retroactive, but will continue to apply going forward.

Benchmark Description: Primary: Russell 2000 Index measures the performance of the small-cap segment of the U.S. equity universe. Russell 2000 is a subset of the Russell 3000 Index representing approximately 10% of the total market capitalization of that index. It includes approximately 2000 of the smallest securities based on a combination of their market cap and current index membership. Secondary: Russell 2000 Value Index measures the performance of the small-cap segment of the U.S. equity universe. It includes those Russell 2000 Index companies with lower price-to-book ratios and lower forecasted growth values. Benchmark returns are not covered by the report of independent verifiers.

Performance and Fees: Gross of fee returns are calculated gross of management and custodian fees and net of transaction costs. Net of fee returns are calculated net of an annual model fee of 1.00% and transaction cost and gross of custodian and other fees. The 1.00% model London Company management fee applied is the highest tier of the current composite fee schedule. This fee is applied monthly to the gross return at 1/12th the annual rate, which is 0.0833% per month. Actual investment advisory fees incurred by clients may vary. Net of fee returns prior to January 1, 2009 are calculated net of actual London Company management fees and transaction costs and gross of custodian and other fees. Some of the accounts in this composite paid a bundled fee, which included custodian, consultant and management fees. In addition, the total percentage of non-fee paying accounts in the composite was 100% from inception through 2005, 19.4% in 2006, 4.1% in 2007, and 1.5% in 2008. Returns may be net of miscellaneous fund expenses. The gross figures do not reflect the deduction of investment advisory fees. Returns are calculated and stated in U.S. dollars. Prior to April 1, 2024 returns are calculated gross of withholding taxes on foreign dividends and interest. Starting April 1, 2024, performance is calculated net or gross of foreign withholding taxes on dividends and interest income dependent on custodian data. Dividends are reinvested. Policies for valuing investments, calculating performance, and preparing GIPS Reports are available upon request.

Past performance should not be taken as a guarantee of future results. The report is for informational purposes only. Data, while obtained from sources we believe to be reliable, cannot be guaranteed and all statistics are subject to change.
